PA Home Energy RESNET/ BPI Training Incentives

PROGRAM OVERVIEW

PA Home Energy integrates the general principles of whole house performance with green home design. At the heart of PA Home Energy is ENERGY STAR. ENERGY STAR is a powerful brand widely recognized by consumers. PA Home Energy will focus on using the ENERGY STAR programs for both new home construction and improving existing homes. Financial incentives will be made to homeowners within Allegheny Power's 23-county service region, which utilize PA Home Energy qualified service providers to certify the construction of their new home or make certified improvements to their existing home. Contractors will be trained and certified to nationally recognized standards.

FINANCIAL INCENTIVES FOR CONTRACTORS AND CONSULTANTS

PA Home Energy is providing financial incentives to Pennsylvania contractors and consultants who wish to obtain RESNET and BPI certification to support the PA Home Energy program. These financial incentives are being provided by the West Penn Power Sustainable Energy Fund (WPPSEF).

Completion of training and testing (\$200 RESNET training + \$200 BPI training)

- Provided to any PA-based builder, contractor, or consultant that completes the training and takes the test (limit 2/ company).

Implementation incentives (\$500)

- Provided to any PA based builder, contractor, or consultant that performs three PA Home Energy audits in the Allegheny Power's 23-county service region (one of these audits must lead to \$1,000 or more in implementation) or have one newly constructed home registered ENERGY STAR. These audits must be completed within 120 days of the training (limit 2/ company).
